

High Performance Coatings

PRODUCT FEATURES

- Easy application
- Superior adhesion
- Built-in inhibitors
- Excellent UV resistance
- 1-year product warranty
- No Primer required

TYPES OF APPLICATIONS

- Storage buildings
- Flat roofs
- Steel
- Modified Bitumen
- TPO & EPDM

Premium Coatings for metal buildings & roof restorations

AG-2000: Single component coating that provides excellent weatherability. AG-2000 creates a seamless membrane to seal against leaks, corrosion, severe weather and degradation caused by sunlight and extreme temperatures. Excellent for **bins, silos, potato farms and hoop buildings**.

AG-2250: Is great for **covering seams, penetrations, and patch repairs**. AG-2250 forms a durable, breathable and weatherproof roofing membrane that is highly resistant to degradation caused by UV and natural weathering.

XRC-106 One application product designed to protect **underbody** from rust, and corrosion. Provides protective barrier that will last in the harshest conditions as well as minimize road noise.

XRC-107: Protect from unwanted rust and corrosion to **inner-frames, seams and rails** with XRC-107. It has excellent salt resistance and can be either direct sprayed or fogged into hard to reach areas, channels, etc.
